Great Chemistry Inside the Office and Out

The Next Great Medical
Breakthroughs are Being
Developed in Pennsylvania

Pennsylvania's life science ecosystem is valued at nearly \$50 billion and is among the top states in key measures of bioscience R&D and innovation, including academic R&D, NIH research funding, venture capital investments, and patenting. For those just starting a life science business, Pennsylvania's entrepreneurial ecosystem is supported by organizations like the Life Sciences Greenhouses, the Ben Franklin Technology Partners, and the Life Sciences Pennsylvania Industry Association so that the next great medical innovations are developed and produced here in Pennsylvania.
