

# BATTERIES

Pittsburgh is an iconic city where what's next is happening now. We are taking on the world's biggest challenges and opportunities in batteries and energy storage, advanced and additive manufacturing, robotics, artificial intelligence, life sciences and more. Located within a day's drive of major East Coast and Midwest markets, we are building the future by attracting top talent, growth companies and investment from the venture capital community.

## The Pittsburgh region has strategic advantages...

- Ecosystem of research universities, technology clusters and high-tech worker training programs
- Cutting-edge battery research at:
  - Carnegie Mellon University's Department of Materials Science and Engineering
  - University of Pittsburgh's Swanson School of Engineering
  - Penn State University's (in State College) Battery and Energy Storage Technology Center (BEST) and Battery Application Technology Testing & Energy Research Laboratory (BATTERY)
- Innovative use of additive, robotics and AI in manufacturing in the educational, institutional and corporate sectors
- Ample water supply and robust electrical infrastructure
- Within 200 miles of Midwest-Southeast vehicle assembly corridor

These key drivers of Pittsburgh's battery and energy storage ecosystem are driving growth across the region.

### TALENT

Highly skilled, highly educated and low cost

### TRANSPORTATION INFRASTRUCTURE

Reliable & convenient air, water, road and rail access

### EDUCATION

Carnegie Mellon University, University of Pittsburgh and 77 other higher ed schools

### UTILITIES

Ample water, electric and natural gas supplies

### INDUSTRY

Innovative battery firms including Eos and Form Energy

### MANUFACTURING EXPERTISE

2.8K establishments and \$14.6B in gross regional product

Formed to attract and retain companies and talent, the Pittsburgh Regional Alliance (PRA) is the primary economic development organization for the 10-county Pittsburgh region. The PRA acts as a front-door concierge for relocation needs and can help your company with a variety of services free of charge:

- Connect companies with talent pipeline organizations
- Provide market research and data to assist in relocation decisions
- Identify real estate opportunities
- Facilitate site searches and visits
- Connect companies with business service organizations and public partners
- Provide media support and amplification
- Navigate local funding and incentives
