

Semiconductors

Integrating Society One Chip at a Time

Grow Digital in Pennsylvania

Located within a robust ecosystem of advanced manufacturing, robotics, and technological innovation, Pennsylvania's semiconductor industry generates over 750 million USD in annual export value and accounts for nearly 2,000 manufacturing jobs. Beyond startup talents from Pittsburgh's renowned Carnegie Mellon University, Pennsylvania is the headquarters for industry players across the supply chain, including Vishay Intertechnology, Aktron Technologies, Onsemi, and Coherent Corp (formerly IV-II Technologies).

Open your chip design center in Pennsylvania and benefit from a wealth of engineering talent coming out of Upenn, PenState and CMU.
